

OSAI Announces Procurement Pre-Qualification Assistance Initiative

Are you preparing a response to a Federal Request for Proposal or otherwise interested in providing products and services under a Government contract? If that contract involves the provision of an anti-terrorism technology or service, and you are concerned about potential liability associated with that contract, contact the Office of SAFETY Act Implementation (OSAI) at safetyacthelpdesk@dhs.gov with the following information to participate in our Procurement Pre-Qualification Assistance Initiative:

1. Name / identifying information concerning the procurement
2. Name and contact data for contracting / program official for the procurement
3. Expected date of issuance of RFP or contract award
4. Technical description of the technology or service to be provided
5. Your name, company and contact information (phone/email)

Your incoming email will be treated as SAFETY Act Confidential Information. OSAI will contact the contracting or program office and, if requirements are met, will prepare a Pre-Qualification Designation Notice which will be published at www.safetyact.gov. If requirements are not met, OSAI may be able to assist you in the filing of a traditional SAFETY Act application.
